PRODUCT ENGINEERING

Published Monthly

INDEX TO VOLUME XVI **JANUARY TO DECEMBER, 1945**

This index covering the 12 monthly numbers of PRODUCT ENGINEERING for 1945 is presented in three sections:

1. An alphabetical index arranged according to the chief subject matter and cross-indexed to facilitate locating the item sought.

2. A classified index with articles appearing under 15 appropriate headings.

3. An authors' index listing the names of the writers and the subjects they have presented in the 12-month period.

Page references to editorials are listed in a separate box.

McGraw-Hill Publishing Company, Inc. 330 West 42nd Street, New York 18, N.Y.

ALPHABETICAL INDEX

— A —

A patent incentive system that works.. 577
Acceptance specifications for repaired new castings 602
Accumulators and their application—design of hydraulic system V..... 344
(discussion accumulators)..... 639
Acrylic parts, correct design insures optical efficiency of..... 415
Adhesives for built-up assemblies..... 289
Aircraft electrical systems, design problems for safe failure in..... 657
Aircraft electronic controls—design and application problems 750
Aircraft, plastics for (abstract)..... 133
Aircraft requirements, electrical equipment design to meet 49
Aircraft spars caused by riveting operations, elongation in..... 471
Aircraft wings, magnesium..... 32
Air-driven spray painting pump..... 304
Air in ducts, flow of..... 431
Airliner, engineering advances in military plane utilized in new postwar.. 12
Airplane generator brackets (abstract). 204
Airplane, world's fastest..... 635
Airplanes lay field telephone wire..... 346
Aluminum alloy, properties and workability of 75S 481
Aluminum alloy, strength of spot welds in 75S 484
Aluminum alloy rivets, properties and characteristics of 24S-T..... 625
Aluminum alloy sheet, wire stitched lap joints in 38
Aluminum alloys for lightweight structures, high-strength 6
Aluminum alloys, hellum-shielded arc welding of 331
Aluminum and magnesium alloys, fatigue failure in shear panels of..... 222
Aluminum forgings (abstract)..... 60
Aluminum, new coach design makes extensive use of..... 736
Aluminum parts, impact extruded..... 402
Aluminum rotors are pressure-cast..... 760
Aluminum sheet, multiple arc simplifies welding of 733
Aluminum, spot weld characteristics of aged 24S 90
Aluminum, spot welding (abstract)..... 493
Ammunition booster 33
Ammunition feed systems for B-29 remote-controlled machine gun turrets 586
Analysis of gear tooth contact by line of action drawing 532
Analysis of unbalanced forces in multi-cylinder gear drives..... 40
Arc welding of aluminum alloys, helium-shielded 331
Arc welding progress (abstract)..... 280
Arc welds, effect of bead contour on fatigue life of 306
Areas and centroids of filleted corners.. 647
Army hospital car 176
Army ordnance develops weapons for its "customers," how 361
Atom, new source of energy
(special insert September)
Attachments for sheet metal containers, top and bottom 544
Automatic feed mechanisms for various materials 44
Automatic stop mechanisms protect machines and work 130
Auxiliary drum increases tractor usefulness 18

— B —

Bearing tolerances, dynamic inspection method of checking..... 372
Bench belt grinder..... 83
Bench press has adjustable hydraulic control 79
Bolts and screws, shear and tension loads on countersunk..... 308
Bolts, internal wrenching..... 714
Boring machine with hydraulic control.. 456
Brakes and clutches of the wrapping-band type, design of..... 321
Brazed assemblies 295
Brazed joints as affected by fit and finish, strength of 530
Brazed joints in severe service, silver... 412
Brazing reduces costs, hydrogen..... 166
Brazing small assemblies, a cost and quality comparison 274
Buick design, 1946..... 826
Bushings for climate-proofing equipment, sealed electrical..... 849
Butyl, nitrile, GR-S compounds—(synthetic rubber section)..... 764

— C —

Cam design methods and analyses, precision 845
Camera allows study of rocket behavior, ribbon-frame 452
Carbides, cemented 217
Casting application 296
Castings, acceptance specifications for repaired new 602

January 1- 72
February 73-144
March 145-216
April 217-288
May 289-360
June 361-432
July 433-504
August 505-576
September 577-648
October 649-728
November 729-812
December 813-892

EDITORIALS

Balancing war and peace economies 21
Regional research laboratories..... 85
Research for national defense 165
To whom should go the credit?... 235
Prizes for new design textbooks... 305
For our national security 389
For better technical education:... 461
Creative ideas don't grow in gutters 529
Atomic power for everlasting peace 593
The American society of design engineers 669
Support a design division of the A.S.M.E. 745
Outlaw the atomic bomb 837

SPECIAL SECTIONS

Stainless steels 105
Production processes and methods.. 249
Magnesium:
forming, forging, diecasting 681
Synthetic rubber:
butyl, nitrile, GR-S compounds.. 761
The Atom — new source of power
(Special insert September)

Castings, design proportions affecting qualities of 27
Castings for varying degrees of porosity, sealants for 53
Castings, permanent mold (abstract).. 133
Causes and prevention of defects in welding 121
Cellulose tape printer 303
Cellulose thermoplastics, dimensional stability of 554
Cellulosic plastics, physical properties of. 503
Cemented carbides in product design.... 217
Changes in design speed ordnance production 294
Charger for electric truck batteries..... 83
Circles, polar moments of inertia of..... 143
Circuits and valves, miscellaneous—design of hydraulic systems X..... 746
Circuits and valves, special—design of hydraulic systems IX..... 614
Circulating hot air used for anti-icing, cabin heating and defrosting in B-24-J 384
Clamping devices and principles of design, friction 400
Classification of formed sheet metal parts by shape I, II, III....167, 241, 334
Clutches of the wrapping-band type, design of brakes and 321
Collector rings designed for welded stampings 36
Compass, distant-reading gyro-magnetic (abstract) 630
Compressed air cannon shoots billets from furnace to forging press..... 98
Compression and expansion of various gases 359
Computer development, design planning and scheduling in..... 817
Constellation 156, 226
Containers, top and bottom attachments for 544
Control of drawings and prints in engineering department operation..... 676
Conveyor simplifies material handling, portable power driven..... 589
Correct design insures optical efficiency of acrylic parts 415
Corrosion on plated and unplated stainless, salt water..... 398
Counterausk bolts and screws, shear and tension loads on..... 308
Coupling seals against leakage, quick disconnect 457

— D —

Deep-drawing magnesium, stamping and (special section) 687
Defective welding, causes and prevention 121
Deflections in a square plate with two adjacent fixed edges..... 395
Design of brakes and clutches of the wrapping-band type 321
Design of hydraulic systems:
I—Pumps and application..... 22
II—Packings and application..... 100
III—Motors and cylinders..... 196
IV—Selector and relief valves..... 265
V—Accumulators and application.. 344
(discussion accumulators) 639
VI—Filters and application..... 409
VII—Power systems 485
VIII—Distribution systems 546
IX—Special circuits and valves.... 614
X—Misc. circuits and valves..... 746
Design of machine tools for safety and production 476
Design of torsion rod springs used in M-18 tank destroyer 390
Design planning and scheduling in complex computer development..... 817
Design problems for safe failure in aircraft electrical systems 657
Design proportions affecting qualities of castings 27
Development of patents by small manufacturers 670
Die casting redesigns 294
Die castings extensively used in variable-speed drive redesign 660
Die castings, magnesium (special section) 692
Dielectric heater unit for heavy duty preheating 526
Differential gears, variable speed transmissions with 152
Dimensional allowances for flash-butt welding - solid bars—round, hex, square and rectangular bars—low and medium forging strength steel 575
Dimensional allowances for flash-butt welding tubing and flat sheets, low and medium forging strength steels 576
Dimensional stability of cellulose thermoplastics 554
Dimensioning of rough forgings to assure metal for finishing..... 552
Distribution systems—design of hydraulic systems VIII..... 546
Dormant inventions utilized through employee patent plan..... 187
Drafting room practices of industry and services to be standardized..... 418
Drawing room practice, standardizing (abstract) 203
Drawings and prints in engineering department operation, control of..... 676
Drill chuck, neoprene improves action in 833
Drilling and boring machine has hydraulically operated feed table, multiple 739
Drive maintains uniform tension in processing movie film 14
Dynamic inspection method of checking bearing tolerances 372

— E —

Effect of bead contour on fatigue life of arc welds 306
Effect of cemented carbides on product design 217
Electric motor shaft position control.. 303
Electric motors based on load and duty cycle, selection of..... 558
Electric strain gage prevents overloading boom-type crane 15
Electrical bushings for climate-proofing equipment, sealed 849
Electrical contacts using graded multiple-layers, pressed-powder 618
Electrical equipment design to meet aircraft requirements 49
Electrical equipment, failures from poor mechanical design 537
(comments on failures in electrical equipment) 865
Electrical insulation failures (abstract) 494
Electrical part molded by transfer process, complex 458
Electrical systems, design problems for safe failure in aircraft..... 657
Electrical thermal resistor elements for circuit applications 93
Electronic and hydraulic controls, milling machine for cylinder heads has 522
Electronic circuits control all feeds in new milling machine 524
Electronic controls (abstracts).....135, 204
Electronic controls, aircraft..... 750
Electronic controls, plug connectors and plug-in relays simplify design of.... 740

Electronic device speeds x-ray spectometery 163
Electronic feed control, combination milling machine has 663
Electronic fuel tank gage..... 829
Electronic heating, economics of (abstract) 278
Electronic motor control (abstract).... 350
Electronic timer gives uniform x-ray exposures 80
(x-ray timer credit)..... 280
Electronically controlled bomb fuse..... 836
Elliptic gears for quick return mechanism, proportions of 462
(comments on elliptic gears)..... 865
Elongation in aircraft spars caused by riveting operations 471
Engineering department must specify production methods, why the..... 729
Engineering department operation, control of drawings and prints in..... 676
Engineering department organization determined by basic functions 145
Engineering drawings, release and control procedures for 465
Engineering personnel and cost control 326
Engineering planning—principles and methods 367
Engineering teamwork between America and Britain 1
Enlarged center distance system for improved gear tooth forms..... 339
Extruded aluminum parts, impact..... 402

— F —

Factors affecting selection of a synthetic rubber (synthetic rubber section).. 762
Failures of electrical equipment from poor mechanical design 537
(comments on failures of electrical equipment) 865
Fatigue failure in shear panels of aluminum and magnesium alloys..... 222
Fatigue life of arc welds, effect of bead contour on 306
Fatigue life of parts as affected by grain direction 442
Feed mechanisms for various materials, automatic 44
Feed systems for B-29 remote-controlled machine gun turrets, ammunition.. 586
Filing system, simplified 495
Filleted corners, areas and centroids of. 647
Fillets for stepped shafts in repeated or reversed torsion 71
Films speed training of draftsmen..... 338
Filters and their application—design of hydraulic systems VI..... 409
Fine pitch gears, inspection and tolerances I, II, III.....598, 710, 758
Finish, evaluation of surface..... 601
Flame-cut and forge-welded steam platens 592
Flash-butt welded joints, their design and properties I, II.....511, 621
(see also reference book sheet)..... 575
Flexible hose assemblies for industrial use 880
Flexible lightweight hose—types and construction 795
Flexible shaft drives—design and installation data 594
Flexible shafting aircraft drives..... 320
Flooring made from Thiokol, non-skid.. 104
Flow of air in ducts..... 431
Flywheel spokes and rim, stresses in.. 287
Flywheels calculated by an exact method, kinetic energy in..... 86
Ford cars and trucks, engineering refinements highlight 1946 582
Forged propeller hubs have pierced arms, one-piece 201
Forge-welded steam platens, flame-cut and 592
Forgings, aluminum (abstract)..... 60
Forgings, magnesium (special section).. 682
Forgings, limitations and design of precision press 821
Forgings to assure metal for finishing, dimensioning of rough..... 552
Formed sheet metal parts classified by shape I, II, III.....167, 241, 334
Forming, low-pressure laminate..... 753
Forming magnesium (special section).. 687
Forming magnesium (abstract) 59
Forming methods, sheet—their effect on part design 374
Forming, press—possibilities of heavy sheet and plate..... 125
Forming, sheet metal—principles of design 854
Friction clamping devices and principles of design 400
Frictional supports for adjustable parts 272
Fungus-resistant cloth made from cotton 798
Fuse, electronically controlled bomb.... 836
Fuze, proximity 782

— G —

Gage, electronic fuel tank..... 829
Gas welds in three alloys of sheet magnesium, properties of..... 580
Gases, compression and expansion of various 359
Gear drives, analysis of unbalanced forces in multicylinder..... 40
Gear shaping machine 528
Gear teeth cut simultaneously with shaping machine 328
Gear tooth contact by line of action drawings, analysis of 532
Gear tooth forms, enlarged center distance system for improved 339
Gear trains, speed ratios and torque ratios in epicyclic 270
Geared-turbine locomotive has compact power unit 380
Gears, chemical surface treatment to prevent scuffing of (abstract)..... 868
Gears, cooling worm (abstract)..... 132
Gears for quick return mechanisms, proportions of elliptic..... 462
(comments on elliptic gears)..... 865
Gears, inspection and tolerances, fine pitch I, II, III.....598, 710, 758
Gears, variable speed transmission with double differential 152
Glass-cloth laminate body armor developed by services 786
Glass-laminated sheets safeguard superfortress tanks 37
Government support of research..... 649
Graphical determination of moments of inertia 811
GR-S compounds, butyl, nitrile (synthetic rubber section) 775
Gun-chargers on B-29, compressed air operates 454
Gunnery stations on B-29..... 34

— H —

Hardness penetration, martempering steel 515
Hardness, relation with other mechanical properties 236
Heat control unit, intermittent..... 832
Heating chamber in injection molding machine, two-zone 16
Heating unit, induction..... 164
Helical steel springs 892
Helicopter side panels of molded laminated plastic 99
Helium-shielded arc, stainless steel welds improved by 708
Helium-shielded arc welding of aluminum alloys 331
Hexagonal damping spring eliminates torsional fluctuations 824
High-strength aluminum alloys for lightweight structures 6
Homogenizing machine, cleaning and sterilizing simplified in 300
Hose assemblies for industrial use, flexible 880
Hose, flexible lightweight..... 795
Hospital cars, Army..... 176
How Army ordnance develops weapons for its "customers"..... 361
How can our patent system be modernized? 628
Hydraulic and electronic controls, milling machine for cylinder heads has 522
Hydraulic control, bench press has adjustable 79
Hydraulic control permits feed in two directions, boring machine with.... 456
Hydraulic slide valve design..... 177
Hydraulic systems, design of:
I—Pumps and application..... 22
II—Packings and application..... 100
III—Motors and cylinders..... 196
IV—Selector and relief valves..... 265
V—Accumulators and application.. 344
(discussion accumulators) 639
VI—Filters and application 409
VII—Power systems 485
VIII—Distribution systems 546
IX—Special circuits and valves.... 614
X—Misc. circuits and valves..... 746
Hydraulically controlled machine assemblies 3-piece engine crankshaft..... 666
Hydraulically operated feed table, multiple drilling and boring machine has 739
Hydrogen brazing reduces costs..... 166

— I —

Impact extruded aluminum parts—their design and production 402
Industry demands machines that can be operated safely 407
Injection molding compounds withstand high temperatures 52
Injection molding machine, two-zone heating chamber in..... 16
Instrument panel lighting design and development 838
Insulation, cable (abstract)..... 279
Insulation, high frequency (abstract)... 780
Internal pressure chart for round steel tubing 891
Internal wrenching bolts—design data and uses 714
Invention, research and patents..... 394
Inventions utilized through employee patent plan, dormant 187
Isolation of combined torsional and translational vibration 790

— J-K-L —

Jeep redesigned for civilian use..... 518
Kilowatt calculator 216
Kinetic energy in flywheels calculated by an exact method..... 86
Laminate forming, low-pressure-design data and applications 753
Laminates, fatigue limits of wood (abstract) 205
Laminates, post-formed (abstract)..... 277
Laminating technique, new (abstract).. 632
Lids on sheet metal containers, nibs and catches for 674
Light can move matter, studies indicate that 182
Light metals in transportation (abstract) 699
Lighting design and development, instrument panel 838
Limitations and design of precision press forgings 821
Locomotive has compact power unit, geared-turbine 380
Low expansion high nickel alloy for precision parts 799
Low-pressure laminate forming—design data and applications 753

— M —

Machine tools for safety and production 476
Magnesium aircraft wings 32
Magnesium alloys, fatigue failure in shear panels of aluminum and..... 222
Magnesium alloys, superheating (abstract) 698
Magnesium—forging, forming and die castings (special section) 681
Magnesium forming (abstract) 59
Magnesium joining methods (abstract) 59
Magnesium, properties of gas welds in three alloys of sheet..... 580
Magnesium, stamping and deep-drawing (special section) 687
Magnet mechanisms, permanent....172, 314
Magnetic separator removes swarf from coolant 460
Marine diesel, mechanical interlocks prevent damage in new two-cycle. 297
Martempering steel, limitations of hardness penetration 515
Martempering steel, mechanical and metallurgical advantages of 438
Materials and processes, new (abstract) 349
Materials, organizing knowledge of.... 73
Mechanical and metallurgical advantages of martempering steel..... 438
Mechanical interlocks prevent damage in new two-cycle marine diesel.... 297
Mechanical packing design—cup and flange types 474
Mechanical packing design—U and V-shaped packings 606
Melamine electrical parts, shuttle car with 742
Metallurgy, captured material reflects trends in enemy 347
Method of evaluating test data aids design of rotary pumps..... 653
Milling machine, electronic circuits control all feeds in new..... 524
Milling machine for cylinder heads has electronic and hydraulic controls... 522
Milling machine has electronic feed control 663
Moments of inertia, graphical determination of 811
Motors and controls for remote operation of searchlight, pneumatic..... 590
Motors and cylinders—design of hydraulic systems III..... 196
Motors based on load and duty cycle, selection of electric 558
Multicylinder gear drives, analysis of unbalanced forces in 40
Multiple arc simplifies welding of aluminum sheet 783

— N-O —

Navy training device has robot pilot... 450
Neoprene improves action in drill chuck 833
Nibs and catches for lids on sheet metal containers 674
Nickel alloy for precision parts, low expansion, high 799
Nitrile, butyl, GR-S compounds (synthetic rubber section) 770
Noise and its elimination by corrective design and control 183
(discussion noise elimination)..... 495
Optical efficiency of acrylic parts, correct design insures 415
Organizing knowledge of materials.... 73
O-ring packings adapted for 3,000-lb. pressures 56
O-ring packings in rotary seals for 3,000 lb. pressures 190
Oven serves two presses, double-ended. 20

— P —

Packing design, mechanical—cup and flange types 474
Packing design, mechanical—U and V-shaped 606
Packings adapted for 3,000 lb. pressures, O-ring 56
Packings and their applications—design of hydraulic systems II..... 100
Packings in rotary seals for 3,000 lb. pressures, performance of O-ring... 190
Panels of wood-aluminum construction, sandwich-type shear 841
Patent incentive system that works.... 577
Patent plan, dormant inventions utilized through employee 187
Patent protection (abstract) 349
Patent system, how can it be modernized? 628
Patents by small manufacturers, development of 670
Patents, research, invention and..... 394
Performance of O-ring packings in rotary seals for 3,000 lb. pressures.. 190
Permanent magnet mechanisms and their applications 314
Permanent magnet mechanisms, their design and uses 172

Phosphorous compounds 234
Physical properties of cellulosic plastic 503
Pin and shaft of equal strength..... 215
Planetary mechanism drives spindle, pneumatically-controlled 84
Plastic bottle closures made with automatic press 667
Plastic casings for fire control instrument 387
Plastic for bullets, high density..... 378
Plastic fishing float..... 527
Plastic, helicopter side panels of modica laminated 99
Plastic materials, selection for appearance and performance 192
Plastic molding materials, SPI classification of 723
Plastic notebook binder..... 17
Plastic, physical properties of cellulosic.. 503
Plastic, switching transformer molded of high impact 521
Plastics, blown (abstract) 278
Plastics for aircraft (abstract)..... 133
Plastics, residual stress in (abstract)... 279
Plate with two adjacent fixed edges, deflection in a square 395
Platens, flame-cut and forge-welded... 592
Plug connectors and plug-in relays simplify design of electronic controls.. 740
Pneumatic-electronic sequence control developed for flush riveting machine 246
Pneumatic motors and controls for remote operation of searchlight..... 590
Pneumatically - controlled planetary mechanism drives spindle 84
Polar moments of inertia of circles.... 143
Porosity, sealants for metal castings for varying degrees of..... 53
Powder metal machine parts—design characteristic and data..... 877
Power systems—design of hydraulic systems VII 485
Precision cam design methods and analyses 845
Precision press forgings, limitations and design of 821
Prefabricated steel structure supports weight of oil filter unit..... 82
Press forgings, limitations and design of precision 821
Press forming possibilities of heavy sheet and plate 125
Pressed-powder electrical contacts using graded multiple-layers 618
Pressure chart for round steel tubing, internal 891
Processes, new materials and (abstract) 349
Production methods compared 294
Production methods, why the engineering department must specify..... 729
Production processes and methods (special section) 249
Properties and characteristics of 24S-T aluminum alloy rivets..... 625
Properties and workability of 75S aluminum alloy 481
Properties of gas welds in three alloys of sheet magnesium 580
Proportions of elliptic gears for quick return mechanisms 462
(comments on elliptic gears)..... 865
Proximity fuze 782
Pump, air-driven spray painting..... 304
Pump handles thick liquids, screw..... 453
Pump shaft seal..... 832
Pumps and their application—design of hydraulic systems I..... 22
Pumps, method of evaluating test data aids design of rotary..... 653

— Q-R —

Quick return mechanisms, proportion of elliptic gears for 462
(comments on elliptic gears)..... 865
Radar fundamentals for engineers..... 813
Radar: logical outgrowth of electronics 702
Radar scopes picture invasion coast through clouds 564
Radial engines, balancing of (abstract) 203
Radio receiver, morale..... 830
Recessed head screws vs. slotted head screws 46
Reconversion notes 668, 744, 831
Relation between hardness and other mechanical properties 236
Release and control procedures for engineering drawings 465
Research, government support of..... 649
Research, invention and patents 394
Research must continue to insure national security, technical..... 433
Resistance welding applications..... 296
Resistance wire strain gage applications and circuits 443
Resistance wire strain gage equipment for static and dynamic testing..... 608
Rifle grenade sight, stamped parts in.. 388
Riveting machine, automatic unit replaces four machines..... 302
Riveting machine, pneumatic—electronic sequence control developed for flush 246
Riveting operations, elongation in aircraft spars caused by..... 471
Rivets, properties and characteristics of 24S-T aluminum alloy 625
Robot pilot for Navy training device... 450
Rotary pumps, evaluating test data..... 653
Rotary seals for 3,000 lb. pressures, performance of O-ring packings in..... 190
Rotors are pressure-cast, aluminum.... 760
Rotors, critical speeds of flexible (abtract) 134
Rubber spring elements, calculation of (abstract) 777
Rubbers, static and dynamic testing of natural and synthetic 541

— S —

Safety and production, design of machine tools for 476
Safety, industry demands machines that can be operated with..... 407
Safety interlock devices in two cycle marine diesel 297
Salt water corrosion on plated and unplated stainless 398
Sander, redesigned portable belt..... 19
Sandwich-type shear panels of wood-aluminum construction 841
Screw threads, status of international standardization 470
Screws with recessed heads test stronger than slotted type 46
Sealants for metal castings for varying degrees of porosity 53
Sealed electrical bushings for climate-proofing equipment 849
Searchlight, pneumatic motors and controls for remote operation of..... 590
Selecting plastic materials for appearance and performance..... 192
Selection of electric motors based on load and duty cycle..... 558
Selector and relief valves—design of hydraulic systems IV..... 265
Separator removes swarf from coolant, magnetic 460
Sequence control developed for flush riveting machine, pneumatic-electronic 246
Shaft drives, flexible..... 594
Shafting operates aircraft units, flexible 320
Shafts in repeated or reversed torsion, fillets for stepped..... 71
Shaping machine cuts all gear teeth simultaneously 528
Shear and tension loads on countersunk bolts and screws 308
Shear panels of aluminum and magnesium alloys, fatigue failure in..... 222
Shear panels of wood-aluminum construction, sandwich type..... 841
Sheet forming methods; their effect on part design 374
Sheet magnesium alloys, gas welds in 580
Sheet metal formed parts classified by shape I, II, III.....167, 241, 334
Sheet metal forming—principles of design 854
Sheet metal stamping—principles of design 756
Shuttle car with melamine electrical parts 742
Silicone compounds (abstract)..... 203
Silicones have limitations (abstract)... 204
Silicone resins and plastics (abstract).. 629
Silicone resins, application of (abstract) 204
Silver brazed joints in severe service... 412
Slide valve design decreases manufacturing cost, lightweight 177
Slotted vs. recessed head screws..... 46
Snow tractor and trailer..... 97
Society for design engineers.669, 745, 788, 864
Sorting and grading machine..... 459
Speed ratios and torque ratios in epicyclic gear trains 270
SPI classification of plastic molding material 723
Splines promote manufacturing economies, standard involute..... 178
Spot weld characteristics of aged 24S aluminum 90
Spot welding aluminum (abstract) 493
Spot welds in 75S aluminum alloy, strength of 484
Spot welds in lead, lead alloys and terne plate, strength of..... 872
Spray painting with air-driven pump... 304
Spring elements, calculation of rubber (abstract) 777
Spring eliminates torsional fluctuations, hexagonal damping 824
Springs, helical steel..... 892
Springs used in M-18 tank destroyer, design of torsion rod..... 390
Stainless, salt water corrosion on plated and unplated 398
Stainless steel welds improved by helium shielded arc 708
Stainless steels (special section)..... 105
Stamped parts used in rifle grenade sight 388
Stamped spanner wrench..... 460
Stamping and deep-drawing magnesium (special section) 687
Stamping redesigns 295
Stamping, sheet metal—principles of design 756
Stampings, collector rings designed for welded 36
Standard involute splines promote manufacturing economies 178
Standardization of screw threads, status of international 470
Standardizations, electrical (abstract).. 699
Standardized drafting room practices... 418
Standardizing drawing-room practice (abstract) 203
Standards and revisions..... 62
Static and dynamic testing of natural and synthetic rubbers..... 541
Static and dynamic testing, resistance wire strain gage equipment for..... 608
Stitched lap joints in aluminum alloy sheet, wire 38
Stop mechanisms protect machines and work, automatic 130
Strain gage applications and circuits, resistance wire 443
Strain gage equipment for static and dynamic testing, resistance wire... 608
Strain gage prevents overloading boom-type crane, electric 15
Strength of brazed joints as affected by fit and finish 530
Strength of spot welds in 75S aluminum alloy 484
Strength of spot welds in lead, lead alloys and terne plate..... 872
Stress corrosion cracking, prevention of (abstract) 61
Stress distribution, structural discontinuities modify 505
Stresses in flywheel spokes and rim..... 287
Structural discontinuities modify stress distribution 505
Supports for adjustable parts, frictional 272
Switching transformer molded of high-impact plastic 521
Synthetic rubbers in engineering—I..... 761
(special section)
Factors affecting selection of a synthetic rubber 762
Butyl rubber 764
Nitrile rubber 770
GR-S synthetic elastomers..... 775

CLASSIFIED INDEX

DESIGN ANALYSIS AND CALCULATIONS

Airplane generator brackets (abstract). 204
Analysis of gear tooth contact by line of action drawings. 532
Analysis of unbalanced forces in multi-cylinder gear drives. 40
Balancing of radial engines (abstract). 203
Calculation of rubber spring elements (abstract). 777
Cooling of worm gears (abstract). 132
Critical speeds of flexible rotors (abstract). 134
Deflections in a square plate with two adjacent fixed edges. 395
Design of brakes and clutches of the wrapping-band type. 321
Design of torsion rod springs used in M-18 tank destroyer. 390
Design proportions affecting qualities of castings. 27
Dimensional stability of cellulose thermoplastics. 554
Dimensioning of rough forging to assure metal for finishing. 552
Dynamic inspection method of checking bearing tolerances. 372
Electrical equipment design to meet aircraft requirements. 49
Elongation in aircraft spars caused by riveting operations. 471
Enlarged center distance system for improved gear tooth forms. 339
Fatigue life as affected by grain direction. 442
Fatigue limits of wood laminates (abstract). 205
Fillets for stepped shafts in repeated or reversed torsion. 71
Flash-butt welded joints—their design and properties I, II. 511, 621
(see reference book sheet). 575
Graphical determination of moments of inertia. 811
Helical steel springs. 892
Hexagonal damping spring eliminates torsional fluctuations. 824
High-strength aluminum alloys for lightweight structures. 6
Impact extruded aluminum parts. 402
Internal pressure chart for round steel tubing. 891
Internal wrenching bolts, design data and uses. 714
Isolation of combined torsional and translational vibration. 790
Kilowatt calculator. 216
Kinetic energy in flywheels calculated by an exact method. 86
Magnesium (special section). 681
Forgings. 682
Stamping and deep-drawing. 687
Die castings. 692
Method of evaluating test data aids design of rotary pumps. 653
Noise and its elimination by corrective design and control. 183
(discussion noise control). 495
Pin and shaft of equal strength. 215
Polar moments of inertia of circles. 143
Precision cam design — methods and analyses. 845
Properties and characteristics of 24S-T aluminum alloy rivets. 625
Proportions of elliptic gears for quick return mechanisms. 462
(comments on elliptic gears). 865
Residual stress in plastics (abstract). 279
Selection of electric motors based on load and duty cycle. 558
Silver brazed joints in sever service. 412
Slotted vs. recessed head screws. 46
Speed ratios and torque ratios in epicyclic gear trains. 270
Spot weld characteristics of aged 24S aluminum. 90
Standard involute splines promote manufacturing economies. 178
Stresses in flywheel spokes and rim. 287
Structural discontinuities modify stress distribution. 505
Torsional rigidity calculations for waffle type construction. 393
Wire stitched lap joints in aluminum alloy sheet. 38

DESIGN DESCRIPTIONS

Air-driven spray painting pump. 304
Airplanes lay field telephone wire. 346
Ammunition booster. 33
Ammunition feed systems for B-29 remote-controlled machine gun turrets 586
Army hospital car. 176
Automatic riveting machine. 302
Bench belt grinder. 83
Bench press has hydraulic control. 79
Boring machine with hydraulic control. 456
Buick, 1946. 826
Butt-flash welder. 834
Cellulose tape printer. 303
Charge for electric truck batteries. 83
Circulating hot air used for anti-icing, cabin heating and defrosting in B-24-J. 384
Coach design makes extensive use of aluminum. 736
Collector rings of welded stampings. 36
Complex electrical part molded by transfer process. 458
Compressed air cannon shoots billets. 98
Compressed air operates gun charges on B-29. 454
Constellation. 156, 226
Coupling seals off lines when opened. 591
Design of machine tools for safety and production. 476
Die castings extensively used in variable speed drive redesign. 660
Dielectric heater unit for heavy duty preheating. 526
Double-ended oven serves two presses. 20
Drive maintains uniform tension in processing movie film. 14
Electric motor shaft position control. 303
Electric strain gage prevents overloading boom-type crane. 15
Electronic circuits control all feeds in new milling machine. 524
Electronic fuel tank gage. 829
Electronic timer gives uniform X-ray exposures. 80
(credit electronic timer). 280
Electronically controlled bomb fuse. 836
Experimental planes test design theories 248
Flame-cut and forge-welded steam platens. 592
Flexible shafting aircraft drives. 320
Ford cars and trucks, 1946. 582
Gear shaping machine. 528
Geared-turbine locomotive. 380
Glass-laminated sheets safeguard superfortress tanks. 37
Greater threading accuracy obtained with new lead screw. 743
Hard alloy used for Navy searchlight reflectors. 99
Helicopter side panels of molded laminated plastic. 99
High density plastic developed for frangible bullets. 378
Homogenizing machine. 300
Hydraulically controlled machine assembles 3-piece engine crankshaft. 666
Induction heating unit. 164
Injection molding machine features two-zone heating chamber. 16
Intermittent heat control unit. 832
Jeep redesigned for civilian use. 518
Journal box lid. 836
Lightweight slide valve. 177
Machine sorts and grades edibles by specific gravity. 459
Magnetic separator. 460
Midget armature molded of phenolic plastic. 592
Milling machine for cylinder heads has electronic and hydraulic controls. 522
Milling machine has electronic feed control. 663
Mobile generator produces oxygen at advance bases. 668
Modified British walkie-talkie uses minimum of critical materials. 382
Multiple drilling and boring machine has hydraulically operated feed table. 739
Neoprene improves action in drill chuck 833
Plastic bottle closures made with automatic press. 667
Plastic fishing float has variable buoyancy. 527
Plastic notebook binder replaces metal. 17
Plug connectors and plug-in relays simplify design of electronic controls. 740
Pneumatic-electronic sequence control developed for flush riveting machine 246
Pneumatic motors and controls for remote operation of searchlight. 590
Pneumatically controlled planetary mechanism drives spindle. 84
Portable belt sander. 19
Portable power driven conveyor simplifies material handling. 589
Postwar airliner utilizes engineering advances in military plane. 12
Prefabricated steel structure. 82
Proximity fuze. 782
Pump shaft seal. 832
Quick disconnect couplings. 457
Radio receivers, morale. 830
Redesigned magnetic comparator. 301
Remote gunnery stations on B-29. 84
Ribbon-frame camera. 452
Robot pilot for Navy training device. 450
Screw pump handles thick liquids. 453
Shock absorber for truck seat. 304
Shuttle car with melamine electrical parts. 742
Snow tractor and trailer. 97
Stamped parts used in rifle grenade sight 388
Stamped spanner wrench. 460
Suspended solids removed continuously. 387
Switching transformer molded of high-impact plastic. 521
Three-dimensional vibration table cycles automatically. 664
Torsion bar suspension in M-18. 318
Tractor, auxiliary drum increases usefulness. 18
Tractor for civilian use, wide track. 848
Two-cycle marine diesel. 297
Type "21" U-boat (abstract). 697
Vacuum cleaner, portable industrial. 831
Vacuum gage has improved appearance 744
Variable speed transmission with double differential gears. 152
Water purifier. 833
Wind tunnel completed at California Institute of Technology. 490
Wind tunnels, supersonic. 856
X-ray spectometer. 163

ELECTRIC PARTS, MOTORS AND CONTROLS

Design problems for safe failure in aircraft electrical systems. 657
Distant-reading gyro-magnetic compass (abstract). 630
Electrical equipment design to meet aircraft requirements. 49
Electrical insulation failures (abstract). 494
Failures of electrical equipment from poor mechanical design. 537
(comments on failures of electrical equipment). 865
Instrument panel lighting design and development. 838
Pressed-powder electrical contacts using graded multiple-layers. 618
Sealed electrical bushings for climate-proofing equipment. 849
Selection of electric motors based on load and duty cycle. 558
Thermal resistor elements for electrical circuit applications. 93

ELECTRONIC UNITS AND CIRCUITS

Aircraft electronic controls—design and application problems. 750
Combination milling machine has electronic feed control. 663
Dielectric heater unit for heavy duty preheating. 526
Economics of electronic heating (abstract). 278
Electronic circuits control all feeds in new milling machine. 524
Electronic controls (abstracts). 135, 204
Electronic device speeds x-ray spectometery. 163
Electronic motor control (abstract). 350
Electronic fuel tank gage. 829
Electronic timer gives uniform x-ray exposures. 80
(credit electronic timer). 280
Milling machine for cylinder heads has electronic and hydraulic controls. 522
Plug connectors and plug-in relays simplify design of electronic controls. 740
Pneumatic-electronic sequence control developed for flush riveting machine 246
Radar fundamentals for engineers. 813
Radar: logical outgrowth of electronics. 702
Radar scopes picture invasion coast through clouds. 564

ENGINEERING DEPARTMENT ORGANIZATION

Control of drawings and prints in engineering department operation. 676
Design planning and scheduling in complex computer development. 817
Development of patents by small manufacturers. 670
Dormant inventions utilized through employee patent plan. 187
Drafting room practices of industry and services to be standardized. 418
Engineering department basic functions 145
Engineering personnel and cost control. 326

Engineering teamwork between America and Britain 1
How can our patent system be modernized? 628
Patent incentive system that works.... 577
Patent protection (abstract)..... 349
Release and control procedures for engineering drawings 465
Simplified filing system..... 495
Slide films speed training of draftsmen. 338
Standardizing drawing-room practice (abstract) 203
Why the engineering department must specify production methods..... 729

HYDRAULIC AND PNEUMATIC CONTROLS

Bench press has hydraulic control..... 79
Boring machine with hydraulic control. 456
Butt-flash welder 834
Compressed-air cannon shoots billets.... 98
Control systems and mechanisms in the Constellation 156, 226
Design of hydraulic systems:
I—Pumps and application..... 22
II—Packings and application..... 100
III—Motors and cylinders..... 196
IV—Selector and relief valves..... 266
V—Accumulators and application.. 344
(discussion accumulators)..... 639
VI—Filters and application..... 409
VII—Power systems 485
VIII—Distribution systems 546
IX—Special circuits and valves.... 614
X—Misc. circuits and valves..... 746
Electronic circuits control all feeds in new milling machine..... 524
Flow of air in ducts..... 431
Hydraulically controlled machine assembles 3-piece engine crankshaft.. 666
Lightweight slide valve..... 177
Mechanical packing design—cup and flange types 474
Mechanical packing design—U and V-shaped 606
Method of evaluating test data aids design of rotary pumps..... 653
Milling machine for cylinder heads has electronic and hydraulic controls... 522
Multiple drilling and boring machine has hydraulically operated feed table.. 739
O-ring packings adapted for 3,000-lb. pressures 56
Performance of O-ring packings in rotary seals for 3,000-lb pressures... 190
Plastic bottle closures made with automatic press 667
Pneumatic-electronic sequence control developed for flush riveting machine 246
Pneumatically-controlled planetary mechanism drives spindle..... 84
Pneumatic motors and controls for remote operation of searchlight..... 590

MATERIALS—METALS

Ferrous

Acceptance specifications for repaired new castings..... 602
Captured material reflects trends in enemy metallurgy 347
Design proportions affecting qualities of castings 27
Fatigue life as affected by grain direction 442
Low expansion alloys for precision parts 799
Martempering steel, limitations of hardness penetration 515
Mechanical and metallurgical advantages of martempering steel..... 438
Organizing knowledge of materials..... 73
Powder metal machine parts-design characteristics and data..... 875
Salt water corrosion on plated and unplated stainless 398
Stainless steels (special section)..... 105
Stainless steel welds improved by helium shielded arc 708
Torsion rod springs in M-18 tank..... 390

Non-Ferrous

Acceptance specifications for repaired new castings 602
Aluminum and magnesium permanent mold castings (abstract)..... 133
Aluminum forgings (abstract)..... 60
Aluminum rotors 760
Captured material reflects trends in enemy metallurgy 347
Coach design makes extensive use of aluminum 736
Effect of cemented carbides on product design 217
Fatigue failure in shear panels of aluminum and magnesium alloys..... 222
High-strength aluminum alloys for lightweight structures 6
Impact extruded aluminum parts..... 402
Light metals in transportation (abstract) 699
Magnesium aircraft wings..... 32
Magnesium (special section)..... 681
Forgings 682
Stamping and deep-drawing..... 687
Die castings 692
Magnesium, forming (abstract)..... 59
Magnesium joining methods (abstract). 59
New materials and processes (abstract). 349
Organizing knowledge of materials..... 73
Permanent mold castings (abstract).... 133
Powder metal machine parts—design characteristics and data..... 877
Pressed-powder electrical contacts using graded multiple-layers 618
Properties and workability of 75S aluminum alloy 481
Properties of gas welds in three alloys of sheet magnesium..... 580
Spot weld characteristics of aged 24S aluminum 90
Strength of spot welds in 75S aluminum alloy 484
Stress corrosion cracking prevention (abtract) 61
Superheating magnesium alloys..... 698

MATERIALS—NON-METAL

Ceramics, Fabric, Glass, Misc.

Electrical insulation failures (abstract). 494
Fatigue limits of wood laminates (abstract) 205
Glass laminated sheets safeguard superfortress tanks 37
Sandwich-type shear panels of wood-aluminum construction 841
Sealed electrical bushings for climate-proofing equipment 849

Plastics

Adhesives for built-up assemblies..... 289
Blown plastics (abstract)..... 278
Complex electrical part molded by transfer process 458
Dimensional stability of cellulose thermoplastics 554
Economics of electronic heating (abstract) 278
Glass-cloth laminate body armor developed by services..... 786
Helicopter side panels of molded laminated plastic 99
High density plastic developed for frangible bullets 378
High frequency insulation (abstract).. 780
Injection molding compounds withstand high temperatures 52
Low-pressure laminate forming..... 753
Midget armature molded of phenolic plastic 592
Optical efficiency of acrylic parts..... 415
Physical properties of cellulosic plastics 503
Plastic casings for fire control instrument 387
Plastic notebook binder..... 17
Plastic bottle closures made with automatic press 667
Plastic fishing float..... 527
Plastics for aircraft (abstract)..... 133
Post-formed laminates (abstract)..... 277
Residual stress in plastics (abstract).... 279
Sealants for metal castings for varying degrees of porosity..... 53
Selecting plastic materials for appearance and performance..... 192
Shuttle car with melamine electrical parts 742
Silicone compounds (abstract)..... 203
Silicone resins and plastics (abstract).. 629
Silicone resins application (abstract)... 204
Silicones have limitations (abstract)... 204
SPI classification of plastic molding materials 723
Switching transformer molded of high-impact plastic 521
Thermoplastic heat-sealing (abstract).. 781
Wiring insulation for tropics (abstracts) 632

Rubber

Cable insulation (abstract)..... 279
Calculation of rubber spring elements (abstract) 777
Static and dynamic testing of natural and synthetic rubbers..... 541
Synthetic rubbers in engineering design I (special section)..... 761
Factors affecting selection of a synthetic rubber 762
Butyl rubber 764
Nitrile rubber 770
GR-S synthetic elastomers..... 775

MECHANICAL MOVEMENTS & MECHANISMS

Automatic feed mechanisms for various materials 44
Automatic stop mechanisms protect machines and work..... 130
Friction clamping devices and principles of design 400
Frictional supports for adjustable parts. 272
Internal wrenching bolts..... 714
Mechanical packing design—cup and flange types 474
Mechanical packing design—U and V-shaped 606
Nibs and catches for lids on sheet metal containers 674
Permanent magnet mechanisms.....172, 314
Top and bottom attachment for sheet metal containers 544
Sheet metal forming..... 854
Sheet metal stamping..... 756
Two-cycle marine diesel..... 297

MECHANICAL PARTS AND DRIVES

Control systems and mechanisms in the Constellation 156, 226
Die castings extensively used in variable speed drive redesign..... 660
Design of brakes and clutches of the wrapping-band type 321
Design of torsion rod springs used in M-18 tank destroyer..... 390
Dynamic inspection method of checking bearing tolerances 372
Enlarged center distance system for improved gear tooth forms..... 339
Fine pitch gears, inspection and tolerances I, II, III.....598, 710, 758
Flexible hose assemblies for industrial use 880
Flexible lightweight hose—types and construction 795
Flexible shaft drives—design and installation data 594
Flexible shafting aircraft drives..... 320
Friction clamping devices and principles of design 400
Hexagonal damping spring eliminates torsional fluctuations 824
Internal wrenching bolts..... 714
O-ring packings adapted for 3,000-lb. pressures 56
Mechanical packing design, cup and flange types 474
Mechanical packing design—U and V-shaped 606
Performance of O-ring packings in rotary seals for 3,000-lb. pressures.. 190
Pneumatically-controlled planetary mechanism drives spindle 84
Precision cam design—methods and analyses 845
Proportions of elliptic gears for quick return mechanisms 462
(comments on elliptic gears)..... 865
Shear and tension loads on countersunk bolts and screws 308
Slotted vs. recessed head screws..... 46
Speed ratios and torque ratios in epicyclic gear trains 270
Standard involute splines promote manufacturing economies 178
Torsion bar suspension in M-18..... 318
Torsion rod springs used in M-18 tank destroyer 390
Variable speed transmission with double differential gears 152

PRODUCTION PROCESSES

Acceptance specifications for repaired new castings 602
Adhesives for built-up assemblies..... 289
Aluminum and magnesium permanent mold castings (abstract) 133
Aluminum forgings (abstract) 60
Arc welding progress (abstract)..... 280
Brazing small assemblies—a cost and quality comparison 274
Causes and prevention of defects in welding 121
Changes in design speed ordnance production 294
Collector rings of welded stampings..... 36
Complex electrical part molded by transfer process 458
Design of magnesium forgings..... 682
Design proportions affecting qualities of castings 27
Dimensional stability of cellulose thermoplastics 554
Dimensioning of rough forgings to assure metal for finishing..... 552
Effect of bead contour on fatigue life of arc welds 306
Fabricating vinyl resins (abstract)..... 631
Fatigue failure in shear panels of aluminum and magnesium alloys 222
Flash-butt welded joints—their design and properties I, II.....511, 621
(see reference book sheet) 675
Formed sheet metal parts classified by shape I, II, III.....167, 241, 334
Gas welds in three alloys of sheet magnesium 580
Helium-shielded arc welding of aluminum alloys 331
Hydrogen brazing reduces costs 166
Impact extruded aluminum parts their design and production 402
Induction hardening (abstract) 61, 202
Induction heating (abstract)..... 203
Internal surface hardening (abstract).. 202
Limitations and design of precision press forgings 821
Low pressure laminate forming..... 753
Magnesium (special section)..... 681
Forgings 682
Stamping and deep-drawing..... 687
Die castings 692
Martempering steel, limitations of hardness penetration 515
Mechanical and metallurgical advantages of martempering steel..... 438
Multiple arc simplifies welding of aluminum sheet 733

Multiple torch pressure welding (abstract) 61
New laminating technique (abstract)... 632
One-piece forged propeller hubs have pierced arms 201
Press forming possibilities of heavy sheet and plate 126
Pressed-powder using graded multiple-layers 618
Production processes and methods (special section) 249
Properties and workability of 75S aluminum alloy 481
Properties of gas welds in three alloys of sheet magnesium 580
Sealants for metal castings for varying degrees of porosity..... 53
Sheet forming methods—their effect on part design 374
Sheet metal forming—principles of design 854
Sheet metal stamping—principles of design 756
Silver brazed joints in severe service... 412
Spot weld characteristics of aged 24S aluminum 90
Spot welding aluminum (abstract)..... 493
Stainless steel welds improved by helium shielded arc 708
Stamped parts used in rifle grenade sight 388
Strength of brazed joints as affected by fit and finish..... 530
Strength of spot welds in 75S aluminum alloy 484
Strength of spot welds in lead, lead alloys and terne plate..... 872
Welded machinery (abstract)..... 134
Welded plate joints (abstract)..... 132
Wire stitched lap joints in aluminum alloy sheet 38

REFERENCE BOOK SHEETS

Areas and centroids of filleted corners 647
Compression and expansion of various gases 359
Dimensional allowances for flash-butt welding solid bars, round hex, square and rectangular bars, low and medium forging strength steel..... 575
Dimensional allowances for flash-butt welding tubing and flat sheets, low and medium forging strength steels 576
Fillets for stepped shafts in repeated or reversed torsion 71
Flow of air in ducts..... 431
Graphical determination of moments of inertia 811
Helical steel springs 892
Internal pressure chart for round steel tubing 891
Kilowatt calculator 216
Physical properties of cellulosic plastics 503
Pin and shaft of equal strength..... 215
Polar moments of inertia of circles..... 143

SPI classification of plastic molding materials 723
Stresses in flywheel spokes and rim.... 287

RESEARCH AND TEST METHODS

Airplane generator brackets (abstract) 204
Dynamic inspection method of checking bearing tolerances 372
Effect of bead contour on fatigue life of arc welds 306
Fatigue failure in shear panels of aluminum and magnesium alloys..... 222
Government support of research..... 649
Hardenability, end quench (abstract).. 135
Hardenability test (abstract) 133
How Army ordnance develops weapons for its "customers" 361
Life testing of materials and products (abstract) 567
Method of evaluating test data aids design of rotary pumps 653
Organizing knowledge of materials.... 73
Relation between hardness and other mechanical properties 236
Research, invention and patents..... 394
Resistance wire strain gage equipment for static and dynamic testing..... 608
Resistance wire strain gage applications and circuits 443
Shear and tension loads on countersunk bolts and screws 308
Technical research must continue to insure national security 433
Static and dynamic testing of natural and synthetic rubbers..... 541

STANDARDS AND STANDARDIZATION

Acceptance specifications for repaired new castings 602
Drafting-room practices of industry and services to be standardized..... 418
Electrical standardizations (abstract).. 699
Fine pitch gears, inspection and tolerances I, II, III.....598, 710, 758
Organizing knowledge of materials..... 73
Relation between hardness and other mechanical properties 236
SPI classification of plastic molding materials 723
Standardizing drawing-room practice (abstract) 203
Standards and revisions..... 62
Status of international standardization of screw threads 470

TECHNICAL ABSTRACTS

Agricultural tractors operated on generator gas 866
Airplane generator brackets..... 204
Aluminum forgings 60
Application of silicone resins..... 204
Arc welding progress..... 280
Asbestos brake linings..... 699
Atmospheric corrosion resistant steel... 60
Balancing of radial engines..... 203
Blown plastics 278
Cable insulation 279
Calculation of rubber spring elements 777
Chemical surface treatments to prevent scuffing of gears..... 868
Cooling of worm gears..... 132
Critical speeds of flexible rotors..... 134
Design of induction coils..... 698
Distant-reading gyro-magnetic compass. 630
Economics of electronic heating..... 278
Electrical insulation failures..... 494
Electrical standardizations 699
Electronic controls 135, 204
Electronic motor control..... 350
Electrostatic spraying of porcelain enamel 630
End quench hardenability..... 135
Fatigue limits of wood laminates..... 205
Forming of magnesium..... 59
Fuselage torsion and control-surface flutter 870
High frequency insulation 780
Induction hardening 61, 202
Induction heating 203
Industrial dielectric heating..... 868
Internal surface hardening 202
Laminating technique 632
Light metals in transportation..... 699
Magnesium joining methods..... 59
Multiple torch pressure welding..... 61
New hardenability test 133
New materials and processes..... 349
Patent protection 349
Perforated shear webs..... 870
Permanent mold castings 133
Plastics for aircraft 133
Post-formed laminates 277
Prevention of stress corrosion cracking 61
Quality of soldered joints..... 62
Residual stress in plastics..... 279
Selsyn motors 781
Silicone compounds 203
Silicone resins and plastics..... 629
Silicones have limitations 204
Spot welding aluminum..... 493
Spreading of liquid metal..... 60
Standardizing drawing-room practice.. 203
Stresses in fan rotors 135
Superheating magnesium alloys..... 698
Taxation and new product development. 699
Thermoplastic heat-sealing 781
Torch-welded plastics 870
Triaxiality and cohesive strength of steels 870
Type "21" U-boat..... 697
Welded machinery 134
Welded plate joints 132
Wiring insulation for tropics..... 632

AUTHORS' INDEX

ARATA, W. H.—Low-pressure laminate forming 753

BLESS, Harold—Kilowatt calculator... 216
BOHLE, Fred—Analysis of gear tooth contact by line of action drawings.. 532
BOULTON, B. C.—Organizing knowledge of materials..... 73
Structural discontinuities modify stress distribution 505
BRUCKNER, Robert E.—Compression and expansion of various gases..... 359
BUIST, B. W.—Strength of brazed joints as affected by fit and finish.. 530
BUSH, Vannevar—Government support of research 649

CAMPBELL, Harry—Effect of bead contour on fatigue life of arc welds... 306
CATLIN, L. J.—Internal wrenching bolts—design data and uses..... 714
CLARK, Everett H.—Mechanical packing design—up and flange types 474
Mechanical packing design—U and V-shaped packings 606
CLINTON, H.—Deflections in a square plate with two adjacent fixed edges. 395
CRAIG, John W.—Hydrogen brazing reduces costs 166
CRAWFORD, R. W.—Sealants for metal castings for varying degrees of porosity 53
CRUMP, Harry—Effect of cemented carbides on product design..... 217
CUNNINGHAM, E. N.—Butyl rubber... 764

DEVER, Frederick S.—Causes and prevention of defects in welding..... 121
DODGE, Louis—Areas and centroids of filleted corners 647

FAIR, Marcus A.—Impact extruded aluminum parts—their design and production 402
FEFFERMAN, R.—Sandwich-type shear panels of wood-aluminum construction 841
FIELD, Howard Jr.—Design of hydraulic systems:
I—Pumps and application..... 22
II—Packings and application..... 100
III—Motors and cylinders..... 196
IV—Selector and relief valves..... 265
V—Accumulators and application.. 344
(Discussion accumulators) 639
VI—Filters and application..... 409
VII—Power systems 485
VIII—Distribution systems 546
IX—Special circuits and valves.... 614
X—Misc. circuits and valves..... 746

GLICK, Sanford E.—Sealants for metal castings for varying degrees of porosity 53
GLOOR, W. E.—Dimensional stability of cellulose thermoplastics 554
GOODYEAR, Robert S.—Thermal resistor elements for electrical circuit applications 93
GORDON, George—New adhesives for built-up assemblies 289
GRAINGER, Ben A.—Industry demands machines that can be operated safely 407
GRAY, T. H.—Relation between hardness and other mechanical properties 236
GULLIKSEN, J. Walter—Stamping and deep-drawing magnesium 687
GUINS, Sergei G.—Analysis of unbalanced forces in multicylinder gear drives 40
GUNNING, W. F.—Resistance wire strain gage applications and circuits.... 443
Resistance wire strain gage equipment for static and dynamic testing 608

HAGENBOOK, L. D.—Design of brakes and clutches of the wrapping-band type 321
HARVEY, George W.—Effect of bead contour on fatigue life of arc welds 306
HAUSNER, H. H.—Pressed-powder electrical contacts using graded multiple-layers 618
Sealed electrical bushings for climate-proofing equipment 849
HAVENS, G. G.—New adhesives for built-up assemblies 289
HAYMAN, Richard L.—O-ring packings adapted for 3,000 lb. pressures.... 56
Performance of O-ring packings in rotary seals for 3,000 lb. pressures 190
HEUSCHKEL, J.—Strength of spot welds in lead, lead alloys and terne plate 872
HOLLIDAY, T. B.—Electrical equipment design to meet aircraft requirements 49
Failures of electrical equipment from poor mechanical design..... 537
Design problems for safe failures in aircraft electrical systems..... 657
Aircraft electronic controls..... 750
Instrument panel lighting design and development 838
HOPPOCK, David W.—How Army ordnance develops weapons for its "customers" 361

JONES, R. T.—Silver brazed joints in severe service 412
JONES, W. H.—Strength of brazed joints as affected by fit and finish.. 530
Properties of gas welds in three alloys of sheet magnesium..... 580
Stainless steel welds improved by helium shielded arc..... 708
JUVE, A. E.—GR-S synthetic elastomers 775

KANIGEL, Charles—Kilowatt calculator 216
KASPER, L.—Frictional supports for adjustable parts 272
KEETCH, William A.—Noise and its elimination by corrective design and control 183
KEHLE, O. A.—Brazing small assemblies—a cost and quality comparison 274

LANGHAAR, H.—Sandwich-type shear panels of wood-aluminum construction 841
LANGHAMMER, A. J.—Powder metal machine parts-design characteristics and data 877
LARKIN, R. N.—Technical research must continue to insure national security 433
LARSON, W. S.—Selecting plastic materials for appearance and performance 192
LEWIN, Henri—Kinetic energy in flywheels calculated by an exact method 86
LOCK, Frank—Selection of electric motors based on load and duty cycle 558

MAC DONALD, W. T.—Properties and characteristics of 24S-T aluminum alloy rivets 625
MALLETT, Frank M.—Dimensioning of rough forgings to assure metal for finishing 552
MASDEO, F.—Helium-shielded arc welding of aluminum alloys 331
MASON, A. H.—Polar moments of inertia of circles 148
McKENDRY, Richard—Dynamic inspection method of checking bearing tolerances 372
MEINEL, Mark P.—Formed sheet metal parts classified by shape I, II, III 167, 241, 334
Sheet forming methods; their effect on part design 374
MEYER, John H.—Torsional rigidity calculations for waffle type construction 393
MEYER, A. William—Design of machine tools for safety and production 476
MILLER, R. H.—Proportions of elliptic gears for quick return mechanisms .. 462
MILLER, Paul—Effect of cemented carbides on product design 217
MILLER, Roy A.—High-strength aluminum alloys for lightweight structures 6
MILLS, Wallace C.—Top and bottom attachments for sheet metal containers 544
Nibs and catchers for lids on sheet metal containers 674
Sheet metal stamping 756
Sheet metal forming 854
MOODY, Arthur M. G.—Fillets for stepped shafts in repeated or reversed torsion 71

NACHOD, Carl P.—Helical steel springs 892
NEMSER, D. A.—Low expansion alloys for precision parts 799
NEWMARK, N. M.—Deflections in a square plate with two adjacent fixed edges 395

OBERT, Edward F.—Speed ratios and torque ratios in epicyclic gear trains 270
OCHIEANO, M. L.—Spot weld characteristics of aged 24S aluminum 90
OSTLIND, Benjamin—Internal pressure chart for round steel tubing 891

PERFIELD, William J.—Flexible shaft drives—design and installation data. 594
PHILLIPS, R. W.—Flexible lightweight hose 795
Flexible hose assemblies for industrial use 880
POWELL, Max—Magnesium die castings 692

RASKIN, M.—Properties and workability of 75S aluminum alloy 481
REED, F. E., Jr.—Polar moments of inertia of circles 143
RIEBEN, T. R.—Slotted vs. recessed head screws 46
Shear and tension loads on countersunk bolts and screws 308
RIEBER, William K.—Dormant inventions utilized through employee patent plan 187
Development of patents by small manufacturers 670
RILEY, J. J.—Flash-butt welded joints their design and properties I, II 511, 621
RIVENBURGH, M. R.—Multiple arc welding 733
ROTE, F. B.—Magnesium forgings 682
RUSSELL, William J.—Patent incentive system that works 577
RUSTAY, A. L.—Magnesium forgings .. 682

SALKIN, Max—Changes in design speed ordnance production 294
SCHENKEL, E. R.—Fatigue failure in shear panels of aluminum and magnesium alloys 222
SCHOLTZE, Herman J.—Pin and shaft of equal strength 215
SCOTT, C. H.—Magnesium die castings .. 692
SEFING, F. G.—Low expansion alloy for precision parts 799
SHEPHERD, B. F.—Mechanical and metallurgical advantages of martempering steel 438
Martempering steel—limitations of hardness penetration 515
SILL, MacDonald—Wire stitched lap joints in aluminum alloy sheet ... 38
SMITH, C. H.—Elongation in aircraft spars caused by riveting operations. 471
SMITH, G. Geoffrey—Engineering teamwork between America and Britain. 1
SPENGLER, C. J.—Slotted vs. recessed head screws 46
SPOTTS, Merhyle F.—Stresses in flywheel spokes and rim 287
Enlarged center distance system for improved gear tooth forms 339
Isolation of combined torsional and translational vibration 790
STANARD, Charles H.—Standard involute splines promote manufacturing economies 178
STEWARD, C. W.—Multiple arc welding 733
STONE, D. D.—Fatigue life as affected by grain direction 442
Hexagonal damping spring eliminates torsional fluctuations 824
STRID, C. J.—Salt water corrosion on plated and unplated stainless 398

TALLANT, J. A.—Butadiene-acrylonitrile rubbers 770
TATMAN, Max E.—High-strength aluminum alloys for lightweight structures 6
Properties and characteristics of 24S-T aluminum alloy rivets 625
THOMPSON, James E.—Engineering department basic functions 145
Engineering personnel and cost control 326
Engineering planning—principles and methods 367
Release and control procedures for engineering drawings 466
Control of drawings and prints in engineering department operation 676
TOULMIN, H. A., Jr.—How can our patent system be modernized 628
TROFIMOV, Lev A.—Variable speed transmission with double differential gears 152
TURNER, L. B.—Butyl rubber 764

VAN LEEUWEN, E. G.—Resistance wire strain gage applications and circuits 443

WETTERGREEN, J. A.—Design proportions affecting qualities of castings .. 27
WILD, A. F.—Design planning and scheduling in complex computer development 817
WILSON, Warren E.—Method of evaluating test data aids design of rotary pumps 653
WOLFE, Bernard J.—Friction clamping devices and principles of design 400

YOUNG, C. H.—Proportions of elliptic gears for quick return mechanisms. 462
